

Empowering patients. Empowering lives.

The world's first essential level hearing aid with Deep Neural Network (DNN) technology.

Help your patients enjoy all the sounds of life

Introducing Oticon Jet PX – the hearing aid that redefines the essential hearing care category. Oticon Jet PX uses second generation OpenSound Navigator™ with AI-enabled DNN technology to provide your patients with a more natural listening experience.

Oticon Jet PX with BrainHearing™ technology provides access to the full sound scene with clear contrast and balance. This way, we support the brain's natural way of making sense of sound.

What does Oticon Jet PX offer?

- **A built-in Deep Neural Network**
The DNN is a built-in form of artificial intelligence, trained on 12 million real-life sound scenes. This provides a more comfortable, natural listening experience.
- **Second generation OpenSound Navigator**
Provide your patients with 360° access to speech and clear sound, even in the presence of noise.
- **Support for your patient's brain**
Oticon Jet PX features our BrainHearing technology, supporting the brain's natural way of making sense of sound by giving access to the full sound scene.
- **The power of Polaris™**
Great sound comes from great sound technology. The Polaris platform fuels fast, reliable sound processing and enables the open sound experience.

A wide range of styles

Oticon Jet PX is available in both rechargeable and disposable battery-powered options, with two charging choices to suit your patients' needs. Available in miniRITE and miniBTE styles, Oticon Jet PX is available in five different colors to match your patients' personal preferences.

Oticon SmartCharger Oticon Desktop charger

Help your patients stay connected

Oticon Jet PX features Bluetooth® Low Energy technology and comes with a wide range of helpful wireless accessories, making it possible for your patients to stay connected to their digital world.

Made for iPhone®

Enables hands-free calls on iPhone and iPad®,* and direct streaming on your patient's iPhone, iPad and Mac®.

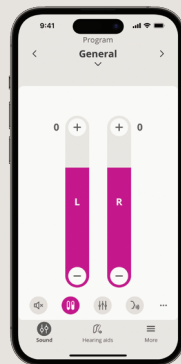

Direct streaming from Android™

Oticon Jet PX is compatible with the Audio Streaming for Hearing Aids (ASHA) protocol, enabling direct streaming from Android™.**

An empowering app experience

Help your patients get the most out of their hearing aids with the Oticon Companion app.

- Discreet volume and program controls
- Customize Tinnitus SoundSupport™ volume and sound pattern
- Remote counseling with a hearing care professional via RemoteCare
- Find my hearing aids feature
